National Security Writing Solutions

Bridging Science and the National Security Mission

WHO WE WORK WITH

SCIENCE & TECHNOLOGY INNOVATION	DEFENSE MODERNIZATION	NATIONAL SECURITY MISSION DELIVERY

WHAT WE DO

We translate complex research and emerging technologies into clear, mission-aligned narratives. The challenge isn't the work, it is the translation. Livian closes that gap. This is strategic communication for national security funding, alignment, and execution. Your team keeps leading the science. We ensure the work is understood, prioritized, and supported.

CORE SUPPORT AREAS

STRATEGIC COMMUNICATIONS	PROGRAM POSITIONING	INSTITUTIONAL NARRATIVE & IDENTITY
Leadership briefs, fact sheets, institutional narratives, and messaging for federal government use-case.	White papers, funding justification narratives, proposal language, capability framing.	Cohesive voice across research centers, labs, and interagency partnerships.

01

FEDERAL MARKET NAVIGATION

Livian helps federally funded research centers, laboratories, and defense innovators navigate the intersection of science, policy, and national security. We map the decision pathways and the offices that decide on a program across DoD, DOE, DHS, and the Intelligence Community. We track the legislation and policy that affect the program, helping program leaders shape narratives around technology relevance and accelerate transition from concept to contract.

02

TECHNOLOGY POLICY TRANSLATION

Livian translates highly technical research of emerging technologies into the strategic language required by policymakers and mission sponsors. Our work helps scientists, engineers, and program managers communicate value to oversight governance and interagency partners.

03

ANALYTIC RIGOR & TRUSTED INSIGHT

Livian writing expertise is rooted in intelligence tradecraft and brings analytic rigor to technical storytelling. We develop data-driven narratives that connect the science to federal government use-cases, ensuring communications and strategies stand up to peer-review and Congressional scrutiny.

04

EXECUTIVE COMMUNICATION & INSTITUTIONAL STRATEGY

Livian advises laboratory directors, program executives, and principal investigators during high visibility transitions like new mission launches, strategic rebranding, or interagency partnerships. We craft institutional strategies and executive messaging that convey technical credibility and national impact, reinforcing trust among sponsors, stakeholders, and the scientific workforce. We prepare leaders for meetings with policymakers and sponsors with briefing materials, talking points, and follow-up correspondence.

WHY LIVIAN

20 YEARS	SENIOR ROLES	TS / SCI
National Security Experience	U.S. Intelligence Community	Full-scope polygraph

FOUNDER EXPERIENCE

Founder Laura Calabria brings 20 years of national security experience, including senior roles in the U.S. Intelligence Community. Her work has informed White House, Congress, Central Intelligence Agency, Director of National Intelligence, Department of Defense, Department of Energy (DOE) National Laboratories. She holds a TS/SCI security clearance with full-scope polygraph.

SCIENCE → STRATEGIC NARRATIVE → MISSION SUPPORT
